A TRUE STATEMENT

At the last term of York court J. B. Mitchell was fined \$200 for selling liquor. On motion of his attorney the verdict was set aside by the court.

To the Trustees of Bruton Parish Church.

Gentlemen:—It's sound sense that we tell you, it will cost you less dollars to paint your church with L. & M. Paint, because more painting is done with one gallon of L. & M. than with two gallons of other paints, and the L. & M. Zinc hardens L. & M. White Lead and makes the L. & M. Paint wear like iron.

Any church will be given a liberal quantity free whenever they paint. Actual cost L. & M. about \$1.20 per gallon.

J. E. Webb, Painter, Hickory, N. C., writes: "Houses painted with L. & M. 15 years ago have not needed painting since."

L. L. DIRICKSON BUYS BONDS.

The Entire Issue of \$12,000 is Awarded to Him at 101.

The finance committee of the city council met yesterday at 12 o'clock to open bids for \$12,000 public improvement bonds. There were quite a number of bids from various sections of the country and a number of local bids. The Peninsula Bank bid 100 even.

Some out-of-town bidders failed to comply with the specifications of the finance committee and did not enclose a certified check. Of course all such bids were not considered by the committee.

The \$12,000 thus secured is to be used for sidewalks and other public improvements. It is entirely optional with the council what this money shall be utilized for, just so it is for public improvements. They can use the whole amount for sidewalks and streets, or any amount that they may see fit.

There are still \$18,000 of bonds the council can issue, the total allowed by the legislature being \$30,000.

It is the almost unanimous wish of the city that an electric light plant be put in, but it is claimed by the committee in charge that they can get no bidders. We do not know what steps the committee have taken or the terms laid down, but it certainly looks strange that no firm for cash down will bid on the installation of the plant. The committee might enlighten the public, or the Gazette will do so if afforded the opportunity.

Chew What You Know About and Know What You Are Chewing

There is real pleasure in chewing the best tobacco grown—where the best tobacco grows—in the famous Piedmont Country.

Only choice selections of this well-matured and thoroughly cured tobacco is used in making SCHNAPPS. That's why SCHNAPPS and others of the Reynold's brands, as shown by the Internal Revenue statistics for a fiscal year, made the wonderful growth of six and one-quarter million pounds, or a net gain of one-third of the entire increased consumption of chewing and smoking tobaccos in the United States.

Evidently, chewers cannot resist the flavor and they cheer SCHNAPPS because SCHNAPPS cheers them more than any other chewing tobacco, and every man that chews SCHNAPPS passes the good thing along—one chewer makes other chewers—until the fact is now established that there are many more

chewers and pounds of tobacco chewed, to the population, in those States where SCHNAPPS tobacco was first sold than there are in the States where SCHNAPPS has not yet been offered to the trade.

SCHNAPPS is like a cup of fine Java coffee, sweetened just enough to bring out its natural, stimulating qualities. SCHNAPPS pleases all classes of chewers: the rich, because they do not find a chew that really pleases them better at any price; the poor, because it is more economical than the large 10c. or 15c. plugs and they get their money's worth of the real snappy, stimulating flavor so appreciated by tobacco lovers. All imitations contain much more sweetening than SCHNAPPS. They are made that way to hide poor tobacco improperly cured.

For the man who chews tobacco for tobacco's sake, there is no chew like SCHNAPPS.

Sold at 50c. per pound in 5c. Cuts. Strictly 10c. and 15c. Plugs

Paints used on the seacoast should be harder than those used in the interior because of the action of the salt in the atmosphere. Paint in those parts of the country where it must stand severe cold and frost of winter and intense heat of summer must be softer, more elastic than that which is subject to great heat all the time. We have the paint that is perfectly adapted to the conditions of this climate and guaranteed to be absolutely free from all forms of adulteration. The pigment base of white and light shades contains 66 2-3 per cent. of lead and 33 1-3 per cent. of zinc oxide, ground and thinned with purified linseed oil and oil driers. Sold subject to chemical analysis. Griffin & Rolf, Paint Dealers and Contractors.
